Title:

Church Facility Security in the 21st Century

Topic:

The security of church buildings/campuses and those who occupy those facilities has landed front and center in the national media. While many believe churches are a primary target for the most serious crimes/criminals, do the facts really support those theories?

This two part presentation will look at the past, present, and future of church facility security. How serious are the threats to churches? What do you really need to be worried about? Are you prepared for the variety of security issues facing your church? Can you confidently say you are prepared to protect those assigned to your care, regardless of the situation? Is an active shooter the most serious threat you face?

For security newbies, this training will provide you with subject matter tools, resources and plans to begin implementing a comprehensive security program for your facility. For those already well on their way, or with established plans/procedures, you will leave this training with new ideas, resources and discussion topics to enhance and strengthen your existing security programs.
